

Geoff Garver is an adjunct professor on interdisciplinary studies on environment and sustainability at McGill University and Concordia University. He completed his PhD in August 2016, after successfully defending his thesis entitled "Law for the Anthropocene: An adaptive eco-bounded legal system for a mutually enhancing human-Earth relationship." He has a B.S. (chemical engineering) from Cornell University (1982), a J.D. *cum laude* from Michigan Law School (1987), and an LL.M. from McGill University (2011). Geoff is actively engaged in the Economics for the Anthropocene partnership (e4a-net.org), for which he served as project coordinator from May 2013 to November 2015. From 2000-2007, he was Director of Submissions on Enforcement Matters at the Commission for Environmental Cooperation. He has also worked for the U.S. Department of Justice, the U.S. Environmental Protection Agency and U.S. District Judge Conrad Cyr. Mr. Garver co-authored *Right Relationship: Building a Whole Earth Economy* (2009), and has several published articles and book chapters. Geoff was raised in a Quaker family in the countryside south of Buffalo, New York and is a member of Montreal Monthly Meeting.
