Hope in the Dark: A Winter Circle of Trust® Retreat

On Campus: Jan 23-26, 2025

A weekend retreat exploring the generative power of darkness through poetry, journaling, silence, and nature with Veta Goler and Mariam Habib.

Join us for a 3-day retreat exploring the generative power of darkness and what winter has to teach us. The waning light and long nights of winter take us deep into the dark. And though we sometimes associate darkness with confusion, fear, or suffering, the dark is also where new life begins and takes root. Like seeds germinating underground in the winter soil, or human life taking shape in the protective dark of the womb, things are growing in the dark that we cannot see.
